Verse 1

```
G       –      G/F#           Em     –   D
   Your little hand's wrapped around my finger
        C                   D
And it's   so quiet in the world tonight
G       –      G/F#   Em        –           D
   Your little eyelids flutter 'cause you're dreamin'
     C                            D
So I   tuck you in, turn on your favorite nightlight
```

Pre-Chorus 1

```
C            /                Em             /            C
   To you, everything's funny,   you've got nothing to regret
         /              D                   /
I'd give all I have, honey,   if you could stay like that
```

Chorus

```
G – G/F#              Em   –    D
Oh, darlin' don't you ever grow up
               C                   D
Don't you ever grow up, just stay this little
G   –  G/F#              Em   –    D
   Oh, darlin' don't you ever grow up
               C                   D
Don't you ever grow up, it could stay this simple
```

Post-Chorus 1

```
C          /                   Em          /                 C
   I won't let nobody hurt you,   won't let no one break your heart
       /                  D    /                     G
And no one will desert you,   just try to never grow up
```

Interlude 1

```
(G) – G/F#  Em – D  C  D – /           G – G/F#  Em – D  C  D
                           Never grow up
```

Verse 2

```
G         –      G/F#       Em    –       D
   You're in the car on the   way to the movies
           C                       D
And you're   mortified your mom's dropping you off
G     –  G/F#                   Em       –     D
   At fourteen, there's just so much you can't do

```
                              C                             D
                 And you can’t wait to move out someday and call your own shots

                 C                      /
Pre-Chorus 2        But don’t make her drop you off around the block
                 Em                    /               C
                     Remember that she’s getting older too
                                    /                   D                      /
                 And don’t lose the way that you dance around in your PJs gettin’ ready for school

                 | G – G/F#           Em     –  D
Chorus           | Oh, darlin’ don’t you ever grow up
                 |           C                D
                 | Don’t you ever grow up, just stay this little
                 | G   – G/F#            Em    –   D
                 |    Oh, darlin’ don’t you ever grow up
                 |           C                   D
                 | Don’t you ever grow up, it could stay this simple

                 C       /                      Em           /            C
Post-Chorus 2      And no one’s ever burned you,    nothing’s ever left you scarred
                     /                       D   /                  G
                 And even though you want to,   just try to never grow up

Interlude 2          | (G)      G/F#   | Em      D       |
                     | C               | D               |

                 C                        G                    D  /
Bridge             Take pictures in your mind of your childhood room
                 C                    G                      D            /
                   Memorize what it sounded like when your dad gets home
                                C                        G
                 Remember the footsteps, remember the words said
                                D                       /
                 And know your little brother’s favourite songs
                 C               G           D                         /
                   I just realized everything I have is someday gonna be gone

                 G      –    G/F#    Em    –   D
Verse 3            So here I am in my   new apartment
                     C                 D
                 In a  big city, they just dropped me off
                 G       –      G/F#        Em     –     D
                   It’s so much colder than I   thought it would be
                     C                       D
                 So I tuck myself, and turn my nightlight on
